# About

---

Polyurethane protective film is a kind film/adhesive thermoplastic transparent, high strength which is used on vehicle surface application to prevent damage on the client's property, ensuring the protection of the original paintwork of the vehicle.

- 10 Year Warranty

DYNOshield paint protection film is warrantied for 10 Years against delamination, yellowing, bubbling and cracking.

# About

**OUTCLASS**  
CAR DETAIL

- **STAIN RESISTANCE:**

Road grime, bird droppings, bugs and air pollution will never leave the film stained or yellow. (providing not exposed for hours/days).

- **INVISIBLE:**

The film once applied is virtually indistinguishable from factory paintwork finish. Also enhances the paintwork, as the final result is glossy.

- **SELF HEALING:**

When exposed to heat (such as the sun or hot water), the enhanced clear coat properties eliminate fine scratches and swirl marks.

- **PRESERVATION:**

Great resistance to scuffs, such as car-park damage or other intentional/unintentional scratches. Increases longevity of the vehicles value.

- **PROTECT**

Impact protection against damage from the road such as stone chips and debris, or if some other car accidentally scuffs your own.

**8 Core Advantages, fully protection.**

360° protect your car paint

No Adhesive Residue	Strong Adhesion	Easy Cleaning	Durable
Self-repairing	Scratch Resistant	Tough and Stable	Eco-friendly

<b>Optical Block</b>	<b>Physical Block</b>	<b>Chemical Block</b>
Light Aging	Photo-oxidation	Scratching
	Stones	Guano
		Acid-Rain

Exposure   Oxidation   Acid-Rain   Scratching   Grits   Bird Droppings

# About Ceramic Coating

---

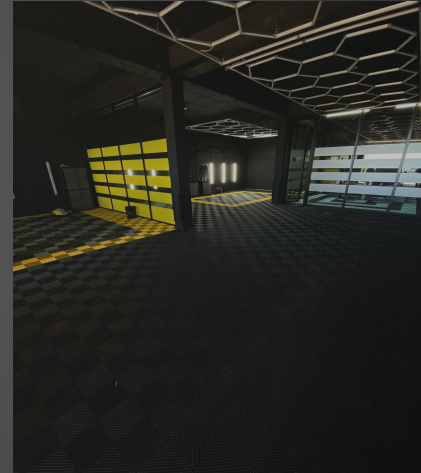

**OUTCLASS**  
CAR DETAIL

The ceramic coating aims to protect the vehicle's paint with a liquid layer that becomes solid equal to a shield (up to 2 microns thick), can also be applied to rims and other interior & exterior details.

Increases the brightness of paintjob and provides repellency/hydrophobia, thus significantly reducing the adherence of dirt and/or the impact of small scratches.

The duration of this protection varies from 12 months to 48 months, depending on the number of layers to be applied.

Note: It can also be applied to other material goods, such as watches, glasses, pens or other household goods.

# Valeting- Interior & Exterior

---

The art of automotive detailing is dynamic and flexible, as “Your budget is our limit.”

In this way, we present different solutions that aim to please the car in the first place, and only then its owner, given that it has more needs than those it appears to have. I list some examples, such as:

- Iron contamination is only visible under the microscope, but it shows up when attacked by the right chemical. This has the importance of being treated, since in the long term it damages the welfare of the painting, which nowadays is increasingly vulnerable. We have the solution.

Many times we think that the brightness highlighted in the details of the interior of a car is a reflection of “clean”, but it is exactly the opposite, because when a certain seat, steering wheel and dashboard have too much shine, it means that it is contaminated with dirt and grease, being an image of the need to be sanitized. Between others.

I would also point out that both the products, the machines and the techniques applied to perform the service are certified, so as not to create micro scratches on the paintwork when, for example, washing and drying the car (inside and outside). All of this is based on carrying out a 360° wash that is safe and healthy for the vehicle.

To perform such services, the working time is longer than the traditional washing that we have in our minds.

It is extremely incomparable and offensive to associate our services with quick, automatic or other car washes that are not part of the “family” of automotive detailing. Therefore, we name our detail service or detailed cleaning to our cleaning/washing/vacuuming services etc.

An Outclass exterior detail consists of a 7-step wash: (1). Wheels Wash (2). Pre Wash (3). Iron and chemical decontaminant (tar/glue) (4). Snow Foam (5). Contact wash two bucket method (6). Paint Sealant (7). Dry with a soft towel and compressed air.

# Example - Gold Valet

Summary of procedures for a Gold valet

Exterior:

- 7 Step Wash
- Wheels and tabs details
- Detailed doors and hinges
- Brush detail to hard-to-reach areas
- Detailed 360° engine bay
- Exhaust tips details
- Soft towel drying
- Conditioning of tires and plastics

Interior:

- Detailed aspiration
- Compressed air technique
- 360° upholstery cleaning
- Carpet
- Cleaning and conditioning
- Deep of compartments
- 360° hygiene
- Interior conditioning
- Air freshener

# VIP, Elite & VP

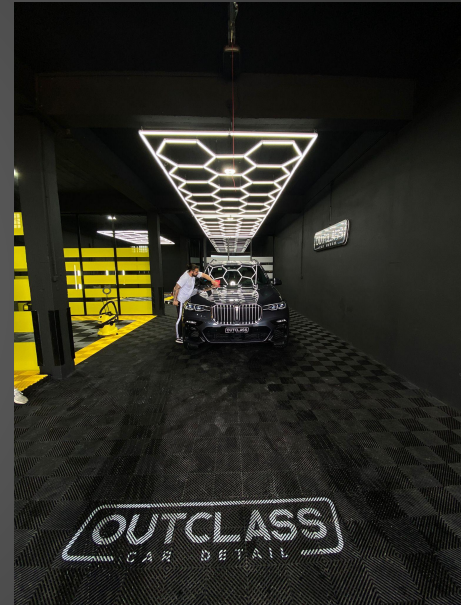

**OUTCLASS**  
CAR DETAIL

Subscriptions of this rank are based on undertaking tasks related to the customer's vehicle, such as:

- MOT
- All types of revisions, tires, or other mechanical markings.
- We collect the vehicle and deliver it to the workshop chosen by the customer or entrusted by us.

Having these extras, we emphasize that the main thing is the monthly car care in which we commit to scheduling the dates in advance, whether the VIP member intends to carry out the detail/valet service for his precious car. The member receives direct discounts on other services carried out in our atelier, also for your friends and family.

Thus, we have several subscription categories in order to cover the personalized needs of each one. It is also possible to create an Individual subscription with the benefits chosen by the customer.

# Interior Restoration

---

**OUTCLASS**  
CAR DETAIL

Interior restoration consists of extremely detailed work in which the mission requires the greatest attention from the professional to, sometimes, recreate the piece in detail in order to maintain its originality.

From seats, steering wheels, buttons, belts, roof, to the dashboard, the technician is dedicated to correcting or reviving the detail that no longer had value.

Dismantling and assembly is carried out professionally and responsibly.

# PDR - Paintless Dent Removal

---

- Consists of removing the dent.
- The panel is spotless again without painting the dented area, saving the originality.
- The professional has about two decades of experience, having started his journey in the USA, where he studied the technique. It aims to reverse the damage in order to maintain the originality of the car.

# Rims and Headlight Restoration

---

This group of services is based on offering work of excellence and high quality to both in regards of rims and headlights.

- Rims: We offer the best service provider in which it is possible to restore the dinner from 0, as well as just correct small defects, repairing it in order to leave it as new.
- Tires and Overhauls: We partner with a company certified to carry out overhauls on supercars and cars still under warranty, as well as supplying high-end certified tires.
- Headlights: We carry out this process in a different way than the traditional way, hence the name Restoration, and it is not a mere polishing. This is due to one of the fundamental processes consists of applying the polymer, in order to significantly prolong their immaculate state, without yellowing, as is common in headlight polishing.

Note: We suggest applying PPF to the headlights after carrying out the restoration to ensure full protection of this vulnerable frontal element.

# Accessories

---

We manage to provide the solution to the needs/desires of your choice.

- Carpets (Original cut, high diversity and quality)
- Rims, Wheels
- Exhausts
- Body Kit
- Car related products
- And others.

We are at your disposal to clarify doubts or other related topics.
